

Report from Leeds

I am, as a PhD student at Uppsala University, most thankful for the EPUAP exchange scholarship in order to prepare for my next study: “Clinical evaluation of a new pressure ulcer risk assessment instrument, the Pressure Ulcer Risk Primary or Secondary Evaluation Tool (PURPOSE T) in a Swedish context”.

Field studies

The visit to Leed’s Community trust, St Gemma’s Hospice and Pinderfield Acute Hospital gave an insight in implementation of PURPOSE T and its use in practice.

Research

At a visit to Leed’s Institute of Clinical Trials Research Isabelle Smith tutored me about statistics. Susanne Coleman tutored me in the development, implementation and the clinical evaluation of PURPOSE T. The theoretical discussions with Jane Nixon will be most helpful when preparing and refining the methodology for my study.
