

For World Wide Pressure Ulcer Prevention Day our team purchased the buttons of the NPUAP site and handed them out to show awareness and support. We wrote questions pertaining to pressure relief and asked each unit in the hospital and rewarded the units with more buttons or candy! Then we had our team shirts made to wear today on National Pressure Ulcer Prevention Day to bring awareness to the day!! I attached a photo too 😊

So far it has been great and very informative for everyone!

Thank you for the permission to use your logo.
