

## **Belfast City Hospital on World Stop Pressure Day**

The Belfast Trust TVN's in Northern Ireland hosted an event within the post graduate centre of the Belfast City Hospital on World Stop Pressure Day.

Formal presentations were delivered to approximately 70 staff, alongside an open exhibition in the foyer area on pressure prevention products and equipment. The Trust aimed to raise ongoing awareness on the importance of Pressure ulcer prevention, importance of completing SKIN bundle documentation, Braden and Datix forms as well as accurate and timely reporting of any new damage. A new e-learning program on Pressure ulcer Prevention for the Health Care Support Workers within the Trust was also launched at this event. This parallels the existing Pressure ulcer Prevention e-learning for registered nurses.
